Il Governo "incontra" l'aerospazio Sottosegretario in visita al distretto

Giampaolo Manzella ha accolto l'invito delle imprese umbre «E' una realtà strategica L'attenzione per il settore è alta»

FOLIGNO

Importante canale aperto tra il Governo e le aziende dell'aerospazio. Il sottosegretario allo Sviluppo economico, Giampaolo Manzella, ha visitato oggi le aziende dell'Umbria Aerospace Cluster. Un incontro voluto per confrontarsi con le imprese operanti nel settore e cogliere i principali aspetti legati al knowhow e alla tecnologia. Un tema ancora più caldo in questi giorni, in cui al centro dell'attenzione ci sono le norme del Decreto rilancio per accelerare i pagamenti e favorire liquidità.

«**Riteniamo** che un dialogo con

il Governo in questi giorni in cui si sta rivedendo la legge per il finanziamento dei progetti di ricerca e sviluppo nel settore aerospaziale, possa essere un'opportunità per cogliere gli aspetti più significativi del nostro business ed operare in sinergia per il rilancio non solo del setto-

re, ma anche della nostra Nazione», ha detto il presidente del Cluster Antonio Baldaccini, ceo e presidente di **Umbragroup**, tra le aziende del Cluster ad accogliere il Sottosegretario Manzella.

«**Il distretto umbro** - ha detto Manzella - è una realtà strategica. Per questo sono venuto a visitare diverse realtà produttive che ogni giorno stanno sui mercati globali con i loro prodotti. Al governo l'attenzione per il settore è alta. Con misure concrete e un tavolo di lavoro su strumenti e strategie future anche nella prospettiva del Recovery Fund. In tutto questo il livello regionale è importantissimo. È qui - e l'Umbria ne è un bell'esempio - che si costruiscono ecosistemi industriali che uniscono grandi e piccole imprese, tecnologia e tradizione metallurgica».
